Chennai, Tamil Nadu

## SUMMARY

I am a full-stack developer specializing in React.js, Node.js, and the MERN stack, with hands-on experience in building intuitive, scalable web applications. I am skilled in creating responsive UIs, integrating RESTful APIs, and optimizing frontend performance.

## EXPERIENCE

### Full Stack Developer (Hybrid)

#### Ysquare Technology

📅 12/2024 Present 📍 Chennai, Tamil Nadu

Full Stack Development – In-House Product Platforms

- Built and enhanced multiple web modules for internal platforms in hospitality, transport, and surveillance domains
- Developed reusable React components (dashboards, forms, tables) with API integration, dynamic validation, and MUI-based design
- Optimized complex SQL queries and backend filters using Node.js, MySQL, and TypeORM to boost performance
- Collaborated in teams using tools like Jira and Clockify, handled bug fixes, and ensured timely delivery through regular reviews and testing
- Contributed to MegaCab, one of India's large-scale live cab booking platforms, working on real-time booking, driver management, and reporting modules
- Technologies used: React.js, TypeScript, Node.js, Express.js, MySQL, TypeORM, Material UI, REST API, Git

## EDUCATION

### M.CA (Master of Computer Application)

#### Jaya Engineering college

📅 06/2021 08/2023 📍 Thiruvallur

### B.CA (Bachelor of Computer Application)

#### D.R.B.C.C.C Hindu college

📅 06/2018 05/2021 📍 Thiruvallur

## TRAINING / COURSES

### Relevant Coursework

React JS

Java Script | ES6+

Next JS

## KEY ACHIEVEMENTS

### Razorpay Payment Gateway Integration

- Successfully integrated Razorpay for secure online payments in the application.
- Handled full flow: order creation, payment capture, and callback verification.

### Multi-Project & Cross-Stack Experience

- Worked across Hotel Management, Cab Booking and Farming Intelligence Platform gaining practical experience across hospitality, transport, and agri-tech domains.

## PROJECTS

### Gifting & Snacks Delivery Platform

Web Application

- Built a full-stack gifting and snacks platform using React allowing users to browse items, customize gifts, and place orders.
- Implemented Firebase Authentication for user validation and used Firestore as the database.
- Technologies used: React, Styled-Components, Airtable, Firebase and MUI Component

### Travel Companion Map App

Web Application

- Developed a web-based travel mapping application that enables users to pin locations, plan routes, and add travel notes.
- Implemented Firebase Authentication for user validation and used Firestore as the database.
- Technologies used: React, Auth, Vite and Leaflet Map.
